OBJECTIVE

To leverage my technical skills, creativity, and passion for coding to contribute to a dynamic development team, drive innovative solutions, and continuously enhance my expertise in Computer Security.

HIGHLIGHT OF QUALIFICATIONS

- Experience identifying, prioritizing and execute tasks in the software development life cycle.
- Knowledge of OWASP top 10 and CWE top 25 highlight the most common web-based vulnerabilities.
- Analytical mindset with strong problem-solving aptitude; able to handle stressful situations calmly and constructively.
- Actively engaged in open-source contributions, demonstrating a commitment to continuous learning and collaboration within the coding community.

TECHNICAL SKILLS SUMMARY

Languages: fluent in CSS, HTML, JavaScript, C/C++, and C#; familiar with PHP, ASP, ASP.NET

Frameworks: Experience with React.js, Proficient in .NET Framework

Databases: Familiar with MySQL, RDBMS, Microsoft SQL Server, entity Framework

Other: Familiar with Docker and MITRE ATT&CK®

EDUCATION

Software Engineering Technician Diploma

Jan 2023 - April 2024

Conestoga College, Waterloo, ON

Program Highlights:

- Systems Analysis and Design
- Data Structure
- Relational Database
- Object-oriented Programming
- Windows Programming
- Advanced Computer Security

PROFESSIONAL DEVELOPMENT AND TRAINING

Software Engineering virtual Experience, JPMorgan Chase & Co.

2023

Web Developer Internship Training, Coddling Gujju

2022

HTML, CSS - Sololearn

2022

Unity Game Development & It's Application, IEEE

2022

ACADEMIC PROJECTS

Personal Portfolio Website, Coddling Gujju

2022

- Designed and developed a personal portfolio website to showcase my skills, projects, and achievements, with a focus on clean and responsive design.
- Created a visually appealing and user-friendly portfolio website to effectively present my professional profile and projects.
- Link: <https://bhumit-patel.netlify.app/>

Transportation Management System (TMS), Conestoga College

2023

- Designed and developed a robust Transportation Management System (TMS) using WPF, Entity Framework, and MySQL. This TMS offers a user-friendly interface for efficient transportation service management, featuring real-time data binding, asynchronous programming, and secure user authentication.
- Key functionalities include invoice generation, reporting, and integration with MySQL. The project showcases advanced database operations, exception handling, and Git version control,

WORK HISTORY

Customer Service, Farm Boy, Waterloo, ON

2023 - Present

VOLUNTEER EXPERIENCE

Study Partners - Student Facilitator, Conestoga college

2023

- Hosting and leading regular meetings and study sessions for peers.
- Facilitating discussions and interactive learning activities to enhance understanding of course material and encourage critical thinking.

EXTRA-CURRICULAR ACTIVITIES

GDSC (Google Developer Student Club) Member, Conestoga College

2023 - Present
